# Matthew Calora

Piscataway, NJ | matthew.calora917@gmail.com | (848) 236-6993 | linkedin.com/in/mc917 | github.com/OreoJuice | oreojuice.github.io

## EDUCATION

**Master of Science, Business Analytics & Artificial Intelligence**
Stevens Institute of Technology | Hoboken, NJ | Expected Graduation: December 2027
**Bachelor of Science, Computer Science**
Rutgers University | New Brunswick, NJ | May 2024

## COURSEWORK

Data Structures, Computer Architecture, Deep Learning, Intro to Artificial Intelligence, Data Science, Software Methodology, Principles of Programming Languages, Big Data Technologies, Management of AI Technologies

## PROFESSIONAL EXPERIENCE

**Web Content Developer and Webmaster**
NYU Arthur L. Carter Journalism Institute | New York City, NY | July 2026 - Present

- Manage and maintain production WordPress websites, creating, updating, and publishing web content with the Gutenberg Block Editor while ensuring accuracy and consistency.
- Troubleshoot and resolve publishing workflow, user permission, and content management issues.
- Collaborate with faculty and staff to implement website updates, test changes, and resolve technical requests in a production environment.

**Team Member**
Gatcha | Edison, NJ | October 2024 - May 2026

- Developed internal tools to automate inventory tracking and financial reporting, improving operational efficiency and data accuracy.
- Diagnosed, repaired, and performed preventative maintenance on arcade and claw machines, reducing downtime and improving operational reliability.
- Processed high-volume customer transactions while resolving technical and operational issues in a fast-paced environment.

## TECHNICAL SKILLS

**Languages:** Python, Java, C, JavaScript, TypeScript, SQL, HTML, CSS
**Frameworks / Libraries:** React, Node.js, Hono, Express, Vite, PyTorch, PySpark
**AI / LLM:** Ollama, Retrieval-Augmented Generation (RAG), Embeddings and Vector Search, Prompt Engineering
**CMS / Web Technologies:** WordPress, Gutenberg Block Editor, REST APIs
**Databases & Tools:** PostgreSQL, SQLite, MongoDB, Git, GitHub, Android Studio
**Other:** WordPress Administration, Content Management Systems (CMS), Website and System Testing, Debugging, Software Development Life Cycle (SDLC), Technical Documentation, Agile/Scrum

## PROJECTS

**Full Stack AI Chatbot** | TypeScript, React, Node.js, Hono, SQLite, Ollama

- Built a full-stack AI chat app running a 12B large language model (LLM) locally, streaming replies from a Node.js REST API to a React frontend, with chats and long-term memory stored in SQLite.
- Implemented retrieval-augmented generation (RAG) using embeddings and cosine-similarity search over 1,976 dialogue lines, returning matches in about 15ms.
- Optimized prompt caching, halving response time and cutting first reply latency from 6s to 0.19s.

**Per Character Dialogue Extractor |** Python

- Built a Python tool that parses game story files and exports the specified character's lines to CSV.

**Lifestyle Planner App |** Java, Android Studio

- Developed an Android application that generates daily schedules using weather API data and persists user information through JSON serialization.
